## 1. Introduction

Cork County Council (CCC) is enhancing pedestrian and cyclist connectivity across the Owenabue River in Carrigaline, Co. Cork. The existing Bóthar Guidel road bridge has narrow footpaths, forcing cyclists onto the busy roadway and contributing to congestion.

To improve safety and accessibility, CCC has commissioned the Bóthar Guidel Pedestrian and Cycle Bridge (BGPB), a dedicated footbridge for active travel. Arup has been appointed as the Designer, providing multi-disciplinary engineering services from planning to detailed design.

This report outlines the rehabilitation strategies for the BGPB.

## 2. Site Location

The proposed development is in a semi urban setting on the outskirts of Carrigaline, approximately 20km from Cork City, as outlined in Figure 3. The lands adjacent to the proposed development are defined as 'Waterbodies' over the River Corrib and 'Artificial Surfaces (Urban Fabric)' either side of the River Owenabue.

The proposed location of the bridge is to the east of the existing road bridge and displayed in Figure 4. The proposed development is surrounded by the existing road bridge, Lidl and the R612 roundabout, sail garden and Carrigaline Skatepark.

### 3. Structural Solution

The proposed structure is a single-span, 34m-long structure with a 5m overall width. The superstructure consists of precast prestressed beams with an in-situ reinforced concrete deck slab cast on permanent formwork.

The bridge is supported by reinforced concrete abutments on piled foundations, located at the edge of the foreshore and aligned parallel to the R612. Steel handrails will be installed for pedestrian and cyclist safety.

Refer to Figure 5 for 3D-rendered image of proposed bridge structure.

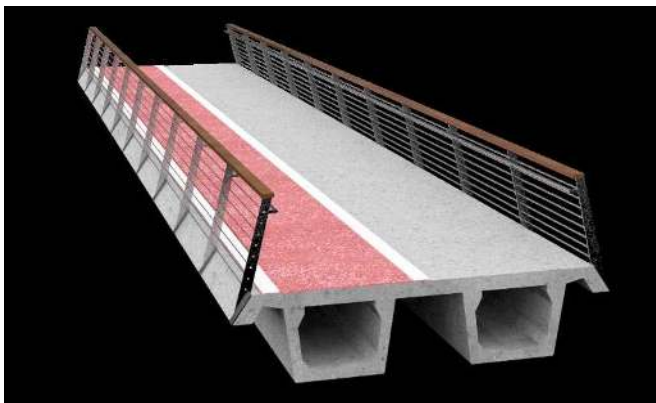

Figure 5 3D Image of Proposed Bridge Structure

### 4. Design Life

The structure is designed in accordance with international standards to have a 120-year design life.

### 5. Inspection and Maintenance

The bridge is a single-span integral structure with no movement joints or deck bearings, minimising maintenance requirements. Routine inspections will be carried out by the Local Authority every two years in accordance with the TII Eirspan Bridge Management System Principle Inspection Manual (AM-STR- 06054). Inspections will primarily be conducted from foot access or mobile platforms if required.

Major maintenance or replacement work is not anticipated for the first 50 years. At that point, only the bridge parapet steelwork is expected to require replacement, while the main concrete span is designed for Working Life Category 5 - 120 years.

Having regard to section 96(2) of the Maritime Area Planning Act 2021 and in line with the design life of the structure, Cork County Council's intention is that the bridge infrastructure will be re-used for the same purpose subject to routine inspection and maintenance.

## 6. Proposed Programme of Rehabilitation

**Table 1 Proposed Programme of Rehabilitation**

Element	Material	Design Life	Time to first inspection	Frequency of Inspection	Time to first Replacement	Time to removal
Main Span over the foreshore	Concrete	120 years	5 years to visual inspection	Visual Inspection every 2 years	120 years	Never. It is intended that a bridge at this location will be required indefinitely
Abutments and Piles	Concrete	120 years	5 years to visual inspection	Visual Inspection every 2 years	120 years	Never. It is intended that a bridge at this location will be required indefinitely
Deck surfacing	Bonded Resin	50 years	5 years to visual inspection	Visual Inspection every 2 years	10 years	Never. It is intended that a bridge at this location will be required indefinitely
Steel Parapet Handrailing	Stainless Steel	120 years	5 years to visual inspection	Visual Inspection every 2 years	50 years	Never. It is intended that a bridge at this location will be required indefinitely

## 7. Estimated Cost of Replacement

The structure is expected to remain in service for its full 120-year design life without requiring replacement. After this period, subject to routine inspection, the bridge girders can be removed and replaced in a similar manner to their original installation. The estimated cost of replacement is approximately €1 million, comparable to the initial installation cost. This cost would be borne by the local authority to ensure the continued provision of a bridge at this location.

## 8. Expected Timelines for Authorisation

Cork County Council's intention is that the bridge infrastructure will be re-used for the same purpose subject to routine inspection and maintenance and in accordance with development permission at the time.
