- 3

3.1 Maritime Usage

A. Provide a brief description of proposed Maritime Usage.

Additional information can be provided as Attachment 3.1.

As a compliance and technology company based in Switzerland, we are developing underwater technology on ROVs and AUVs to survey and support salvage of anthropogenic structures (wrecks) by creating 3D and other models from data. We have already tested this technology in alpine lakes in Switzerland, in full cooperation with the owner and authorities.

The aim is to augment our proprietary deep learning technology and we will share public data analysis on heritage assets to the community at large.

We now wish to test the equipment in saline waters in the North Atlantic. We will deploy non invasive survey technology at a number of wrecks along the south coast. These wrecks will be surveyed using photographic and acoustic techniques.

B. Attachment 3.1 included.

Survey for scientific research – data gathering and analysis.

Our application for this expedition is to conduct marine surveys for the purpose of scientific discovery, research and site investigation.

We will use a small chartered vessel (up to 5 people and crew) and remotely operated electric underwater vehicles (ROV and AUV) that will not disturb the wreck. Survey is by photographic and acoustic means only. No divers will be used.
