UN Convention on the Law of the Sea and the Maritime Jurisdiction Act

4.8 Provide sufficient information addressing the consistency of the proposed Maritime Usage with the Irish State's obligations under the UN Convention on the Law of the Sea and the Maritime Jurisdiction Act.

Additional information can be provided as Attachment 4.8.

The United Nations Convention on the Law of the Sea (UNCLOS), adopted in 1982 and in force since 1994, establishes a comprehensive international legal framework governing all maritime activities, including navigation, resource exploitation, environmental protection, and jurisdictional rights within defined maritime zones such as territorial seas, exclusive economic zones (EEZ), and the continental shelf. It also

requires member to protect and preserve the marine environment. Specifically, Articles 210 and 214 provide the basis under which Ireland regulate dredging activities through permitting.

Ireland ratified UNCLOS in 1996 and has implemented its provisions through national legislation, most notably the Maritime Jurisdiction Act 2021, which consolidates and updates Irish law on maritime boundaries and jurisdiction. This Act defines Ireland's internal waters, territorial sea (12 nautical miles), contiguous zone, EEZ (up to 200 nautical miles), and continental shelf, granting the State rights and responsibilities for resource management, environmental protection, and enforcement within these zones.

Since the proposed maritime usages (dredging works) are carried out under Ireland's permitting regime and with appropriate environmental safeguards (as noted in Attachment 4.3), it is in full compliance with the UN Convention on the Law of the Sea (UNCLOS) and the Maritime Jurisdiction Act 2021. The proposed maritime usage will not impede the right of innocent passage for any UN member state. All works are located within Ireland's territorial waters and respect the State's jurisdiction under national and international law. Pollution prevention measures have been incorporated to ensure no harm or contamination of the marine environment occurs.

Attachment 4.8 included.

Climate Action and Low Carbon Act of 2015, as amended

4.9 Provide sufficient information addressing the consistency of the proposed Maritime Usage with achieving the National Climate Objective, as defined in the Climate Action and Low Carbon Act of 2015, as amended.

Additional information can be provided as Attachment 4.9.

The Climate Action and Low Carbon Development Act 2015, strengthened by the 2021 Amendment, establishes Ireland's statutory framework for addressing climate change. The legislation sets the national transition objective of achieving a climate-neutral economy by 2050, supported by legally binding carbon budgets and sectoral targets. It requires all public and private projects to align with Ireland's climate goals, promoting actions that reduce greenhouse gas emissions and enable the transition to renewable energy sources.

The proposed maritime usages (dredging and disposal) within Buncrana Harbour are fully aligned with the objectives of the Climate Action and Low Carbon Development Act 2015, which has been amended in 2021. All activities will be carried out in an environmentally responsible manner, incorporating best practice measures to prevent pollution and minimize emissions, thereby contributing to national climate action goals. Additional re-use of sand material on the nearby golf course further reduces the carbon footprint of the proposed maritime usage.

Attachment 4.9 included.

4th National Biodiversity Action Plan 2023 – 2030

4.10 Provide sufficient information addressing the consistency of the proposed Maritime Usage with the 4th National Biodiversity Action Plan 2023 – 2030.

Additional information can be provided as Attachment 4.10.

Ireland's 4th National Biodiversity Action Plan (NBAP) sets the national biodiversity agenda for the period 2023-2030 and aims to deliver the transformative changes required to the ways in which we value and protect nature. It will continue to implement actions within the framework of five strategic objectives:

- Objective 1: Adopt a Whole-of-Government, Whole-of-Society Approach to Biodiversity
- Objective 2: Meet Urgent Conservation and Restoration Needs
- Objective 3: Secure Nature's Contribution to People
- Objective 4: Enhance the Evidence Base for Action on Biodiversity
- Objective 5: Strengthen Ireland's Contribution to International Biodiversity Initiatives

The proposed maritime usages (dredging and dumping) are cognisant of the requirement to conserve biodiversity in Ireland, particularly in respect of the requirements of the Habitats Directive regarding the preservation of Natura 2000 Protected Sites. As such, the Maritime Usage License (MUL) Application for these proposed works is accompanied by a Natura Impact Statement (NIS) which considers potential effects to the European Sites and / or on the conservation objectives of their Qualifying Interests (QIs)/Special Conservation Interests (SCIs) through surface water, air, and/or land pathways. The NIS has been prepared cognisant of the requirements of the Habitats Directive (92/43/EEC). It includes a series of mitigation recommendations where potentially significant adverse impacts were identified. These would ensure that the integrity of the QIs and SCI first and foremost but by association and given the nature of the measures proposed, would also contribute generally to the protection of biodiversity interests, ocean health, water quality, underwater noise and seafloor and water column integrity.

National or European Strategic or Policy Objectives

4.11 Provide any additional relevant information with regard to the overall purpose of the proposed maritime usage, with reference to, e.g. National or European strategic or policy objectives and national targets, and strategic research objectives.

Additional information can be included as Attachment 4.11.

The proposed maritime usage aligns with the following key objectives and policies:

- Ireland 2040 National Planning Framework – Supports harbour maintenance as a key to keeping coastal communities connected in an environmentally sustainable manner.
- National Ports Policy 2013 – Supports safe navigability and operational reliability.
