Re: MUL LIC230013 – Request for Amendment to Specific Condition 28 – Attachment 3.6: Marine Strategy Framework Directive

Malone O'Regan Environmental ('MOR Environmental') conducted an assessment of consistency with the Marine Strategy Framework Directive ('MSFD') in Section 3.3 of the Assessment of Impacts on the Maritime Usage ('AIMU') Report, which was submitted to MARA as part of the application for MUL LIC230013.

MOR Environmental confirms that the proposed amendment, seeking the removal of Specific Condition 28, would have no impact on the Maritime Usage consistency with the objectives of the MSFD.

Therefore, we wish to confirm that there are no changes to the assessment made in regard to the Assessment of Impacts on the Maritime Usage ('AIMU') Report submitted with the original MUL Application and that the assessments remain valid.
