1 DURATION

A 5-year licence is being sought, and the devices are to be deployed for up to 24 months.

The intention is to begin survey activities as soon as feasible following license award, with a staged programme of investigations, capitalising on suitable weather windows over the licence duration. This phased approach will progress the overall development towards detailed design stage. The exact mobilisation dates will not be known until the process of procuring a contractor is complete.

Timing of the site investigation activities is dependent on many factors including weather, tidal flows, availability of vessels and the grant of a licence. The granting of a licence will have a direct effect on the timing of site investigation activities.
